

VIDYOCONNECT™ FOR SLACK

VIDYOCONNECT INTEGRATIONS

What do I need? A computer, camera, microphone, speakers, and an internet connection. Finally, of course a **Slack** account.

CONNECTION OPTIONS

There are three ways to initiate a **Vidyo® Enabled Conference** from **Slack**. All through a simple **Slash Command**: `/vidyo`

- 1 In a **Public Channel** type `/vidyo`. This will open a room in Vidyo with the same name of the Slack group and channel. Ex: `vidyodemo#editorial`.
- 2 In a **Private Channel** type `/vidyo`. This will open a room in Vidyo with the same name of the Slack group and channel. A PIN will be generated to ensure only Slack channel members join the room.

Pro Tip: Rooms opened from either public or private channels are also available to join from your Vidyo home screen. Search for the channel name: `vidyodemo#editorial`.

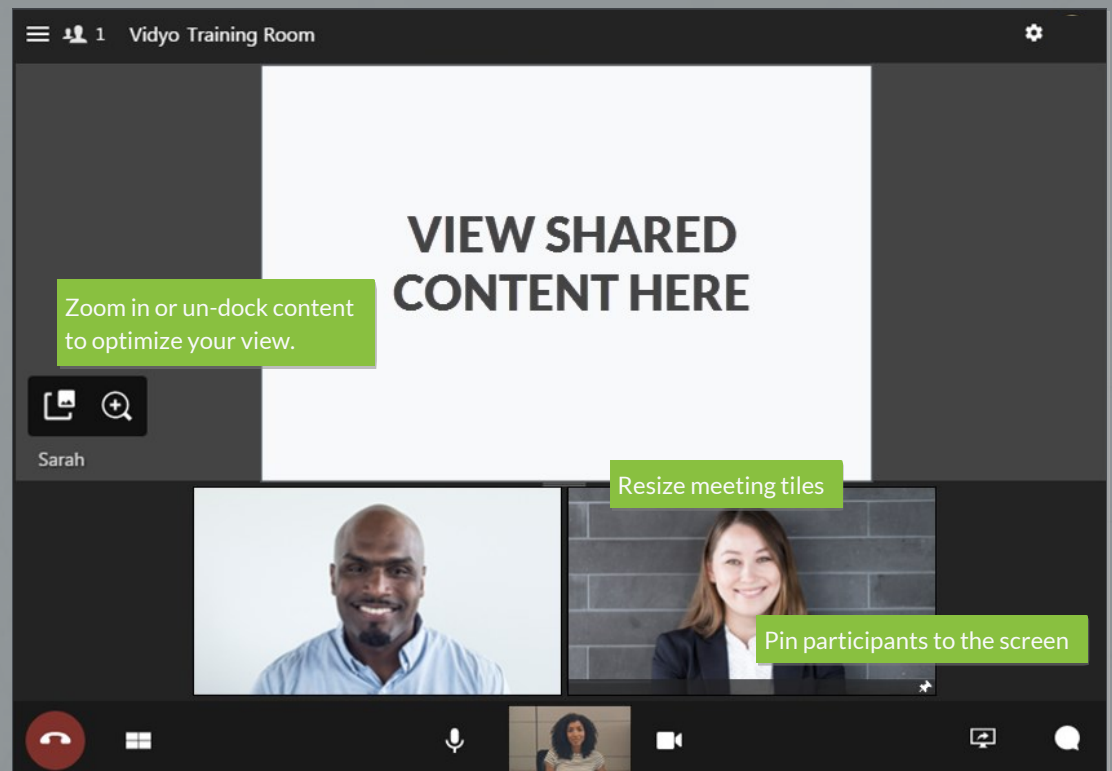

- 3 In a **Direct Message** type `/vidyo`. This opens a temporary room in Vidyo. Each time you type `/vidyo` in a DM a new temporary room is opened.

Pro Tip: Invite additional participants to Vidyo enabled conferences from Slack Channels or Direct Messages by typing `/vidyo @username`. The invitation will appear under the user's Slackbot.
